

# TRUCKED DUMPER

Tracked dumper 1,000kg

Tracked dumper 1,600kg

Tracked dumper 3,000kg

Stand on concrete carrier  
1,000kg

Mini-Tracked dumper 450kg

Tracked timber carrier  
3,100kg (Not CE model)

## 1. What is tracked dumper

Tracked dumpers are vehicles that use rubber tracks rather tires. Tracked dumpers can be described as special vehicles that are use to have better traction on muddy grounds slippery and for harsh job sites. Depending on the size we can call them power barrows as well.

## 2. Where to use a tracked dumper ?

There are many applications for the tracked dumpers. The tracked dumpers can be used in for agriculture and construction purposes. Rubber tracked dumpers are used when a more even distribution of weight is required with the tracks allowing the operator to carry heavier payload on surfaces where gaining traction is difficult for wheeled machinery. Rubber tracked dumpers are used when a more even distribution of weight is required with the tracks allowing the operator to carry heavier payload on surfaces where gaining traction is difficult for wheeled machinery.

## 3. Who uses a tracked dumper ?

Construction companies, constructions contractors , rental companies, military civil engineering, dam constructors, pipe lines builders, Farmers etc.

## EC DECLARATION OF CONFORMITY

conforming to EC Directive 2006/42/EC

We, **Chikusui Ganycom, Inc.**, with its registered address of  
90-1, Fukumatsu, Yoshii-machi, Ukiha-shi, Fukuoka, Japan,  
declare in sole responsibility, that the product

Crawler mini dumper Model BP42/BP35 (item No. 18 according to 9000/14/EC) SNo.1090160  
to which this certificate applies, conforms to the following European Directives:

2006/42/EC - Directive on machinery  
2014/53/EU - Directive on the approximation of the laws of the Member States relating to electromagnetic compatibility  
2000/14/EC and 2005/88/EC - Directive on the approximation of the laws of the Member States relating to the noise emission in the environment by equipment for use outdoors.

To effect correct application of the safety and health requirements stated in the EC Directive, the following standards and/or technical specifications were consulted:

EN ISO 12100:2010  
EN ISO 13857:2008  
EN 949:1998 +A1:2008  
EN ISO 14982:2009

Name and address of the person who keeps the technical documentation:  
Ing. René Horvath  
A-8524 Bad Gams 13  
Austria

Description of the equipment	Dimensions :	(L)1,770mm (W)840mm (H)1,020mm (L)1,725mm (W)740mm (H)1,020mm (L)1,655mm (W)625mm (H)1,020mm
	Engine type :	Honda GX120
	Rated output :	2.1kW/3,600rpm (Set engine speed:3,000rpm)

Conformity assessment according to 2000/14/EC, Annex VI, and 2006/88/EC

Name and address of the Notified Body : **TÜV SUD Industrie Service GmbH**  
Wertendstr. 199 D-80686 München Germany

Measured sound power level : 92dB(A)  
Guaranteed sound power level : 101dB(A)

Fukuoka, Japan, Dec.1st, 2017      Factory Manager Tsutomu Maeda  
(Place and date of issue)                      (Name and job function of authorized person)

All products for exportation are manufactured in accordance with the ISO standards. The overseas products meets the requirement of the USA and EUROPEAN safety standards & compliance.

TRACKED DUMPER FOR CONS.
